## Medical Procedure Use

Dr. Vikram Uddhav Dhaneshwar

### Abstract-

The earliest known medical artifacts date back more than 10,000 years, to the time of the Incas. In terms of both development and implementation, medicine has undergone several transformations since then. At first, it was entirely dependent on herbs, which are members of the vegetative world. Applications were enhanced as it was by various sources throughout time. The majority of applications were external until before 3000 BC, when they shifted to becoming internal. Subsequently, they became both internal and external at the same time. Despite his previous opposition to external application, Hahnemann eventually came around to the idea of applying the same medication both inside and externally (§284). The use of two separate medications continues to be opposed by Organon.

**Key word-** Dr. Samuel Hahnemann, external and internal application of medicines, Organon of medicines, Natrum muriaticum.

### INTRODUCTION

The use of therapeutic plants was first discovered by humans by studying animal behavior, namely by accidental poisoning and subsequent thorough analysis. Primate research on post-fight pain relief and wound healing was conducted by animals. Pain alleviation was the primary goal of all medical applications. As an example, Eber's papyrus mentions distinct medications for various types of pain, the papyrus document from about 3000 BCE discussed the use of bandages, poultices, and liniments infused with medicinal herbs to alleviate pain. Pastes as a pain relief are a more recent development. About 2700 BCE, it arrived. External procedures were used to treat stings and bites. Bandages were originally used to alleviate the discomfort associated with fractures,

swelling, wounds, inflammation, burns, scalds, and dislocations.

Therapeutic massage has long been used for a variety of conditions, including but not limited to: aches and pains, weak muscles, rehabilitation, deformity reduction, and even headaches, chronic sinusitis, and amnesia. Many plants, including calendula, arnica, and mustard oil, were used for massage. Additionally, blistering agents were used since it alleviated swelling, discomfort, and bleeding. Local treatments were also used to treat bites and stings. This included things like cleaning the affected area with hot or cold water, making an incision at the bite site and then administering medication, or extracting stings using a nail, needle, or incision.

Applying heated beetle, bryophyllum, or plaintain leaves externally to maturing boils or abscesses was the traditional method of foreign body removal.

Ingestion of medicinal substances started in the late 2500s BCE (or 2100s BCE). I think salt was the first drug that could be used inside to make people throw up. Subsequently, several chemicals and plants were used. Chemical usage began to creep in over time.

arsenic was perhaps the most often utilized chemical. As a preservative, arsenic eventually replaced its original uses as an antidiarrheal, antiemetic, and antiseptic. Around 700 BCE, sulphur was likely the first medicinal substance to be used topically as well as inwardly. Burns, constipation, diarrhea, pain, and wound healing

were all treated together.

The demand for medicines and medical professionals rose in tandem with the expansion of civilization, as more people needed access to food, clothes, and shelter, and as conflicts broke out more often. Despite his early opposition, Dr. Samuel Hahnemann eventually came around to the idea of homoeopathy in sections 284, 285, and 286 of the 6th edition of the Organon of Medicines. According to Dr. Samuel Hahnemann, in order to speed up the healing process, infection medication should be taken internally and then applied externally to certain areas (such as the back, arm, etc.) at the same time (§285). Only healthy areas of skin should undergo such a surgery.

## CASE PROFILE

A 26 year old male patient came in my OPD with complain of falling of hair in patches on beard on 22 January 2020 at 10:04 am.

Duration of present complaints from 2 months.

There is 2 to 3 bald patches on beard without itching aggravation from perspiration, summers.

### History Of Present Complain –

Before 2 months patient noticed a small bald patch on left side beard of face. Then after 15 days there is 2 more patches he noticed. There is no history of any alternative or modern medicinal this complain treatment for.

### Physical General

- **Appetite:** Good
- **Desire:** Salt

- **stool:** 1 time in a day, satisfactory
- **Urine:** 3- 4 times in a day, pale yellow
- **Perspiration:** Profuse, on face
- **Thermal:** Hot

### Mental General

Consolation aggravates, Do not want to share his feeling or personal life with anyone, walking in a style of female, sexual desire increased, sad.

### Provisional Diagnosis - Alopecia barbae

### Totality of symptoms

- Consolation <

### Fallow Up-

- Introverted
- Desire salt
- Sexual desire increased
- Perspiration profuse
- Falling of hair in patches on beard
- < Summer, perspiration

## Repertorial Chart

**Repertorial Result** - On reportorial analysis natrum muriaticum and nitric

acidscored highest marks.

### First Prescription With Justification.

On the basis of repertorial analysis and symptom similarity natrum muriaticum selected. Potency of the medicine is 30 on the basis of susceptibility of the patient and nature of the disease.

Date	Symptoms	Prescription
22/01/2020	Bald patches on beard since last 2 months. < summers, perspiration.	Natrum Muriaticum 30/Stat Natrum muriaticum 30, Gt X in rectified spirit 10 ml mft Gt /BD for 7days. Saccharumlactis 30/TDS for 7days
29/01/2020	No new bald patches.	Rubrum Metallicum 30/Stat

	Old bald patches slight reduced.	Rubrum Metallicum 30, Gt X in rectified spirit 10ml mft Gt /BD for 10days Saccharum lactis 30/TDS for 10 days
10/02/2020	No any new bald patches on beard. Old patches are improving. No any new complaints.	Rubrum Metallicum 30/Stat Rubrum Metallicum 30, Gt X in rectified spirit 10ml mft Gt /BD for 15days Saccharum lactis 30/TDS for 15days

26/02/2020	No complaints. Patient getting better.	Rubrum Metallicum 30/Stat Rubrum Metallicum 30, Gt X in rectified spirit 10ml mft Gt /BD for 15 days Saccharum lactis 30/TDS for 15 days
02/03/2020	No complaints anymore. Patient improved.	No further prescription.

**Figure Before and After Treatment**

## CONCLUSION

According to §284, §285, §286 which specifies that a well chosen homoeopathic cure might be the basis for this lawsuit,

administered to the patient in a way that is both internal and exterior at the same time. It was already known that the same amount taken orally had the same effect. Likewise, the external application of the simillimum has an effect. If By using this treatment approach, we may greatly increase the likelihood of curing disorders. For example, in the case of alopecia barbae, we saw results within a week, and after we stopped prescribing drugs, the cure was much faster. Additionally, it may be inferred that if the chosen medication is an exact equivalent, the case will begin to improve far more rapidly after just one dosage.
